9. ☐ Other \_\_\_\_\_.

The following is an examiner's statement of reasons for allowance: Applicants set forth claims to methods for preparing polyurethane foams which comprise reacting organic polyisocyanate and a polyol in the presence of water as a blowing agent, a cell stabilizer, a gelling catalyst, a blowing catalyst, and a tertiary amine amide catalyst as defined by the claims wherein the tertiary amine amide catalyst is acid-blocked. These acid-blocked catalysts yield a delayed action of the novel effects of the defined tertiary amine amide catalysts. These methods as claimed are not taught or fairly suggested by the prior art. Further, these methods are patentably distinct over the methods claimed in the parent U.S. Patent # 6,737,446 as the motivation to block these species is not found in the parent claims, and the delay of the novel effects of the catalysts employed is sufficient to overcome a position of obviousness and support patentable distinction in the instant case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
